InfoWave Unveils Advanced Vehicle Tracker

Waveon 618e Helps Fleet Managers Track and Manage their Vehicles Anytime, Anywhere

Singapore, April 20, 2009 - InfoWave Pte Ltd ("InfoWave") today announced the availability of Waveon 618e, an advanced vehicle tracker featuring real-time monitoring of vehicular assets with over-the-air ("OTA") firmware upgrade flexibility for fleet managers running fleet operations. With this OTA function, Waveon 618e reduces deployment costs by providing efficient installation, and controls on-going maintenance costs by significantly simplifying firmware upgrades. This device also provides data logging, alerts and notifications, G-sensor, and geo-fencing functions to meet a wide range of fleet-management solution requirements.

Waveon 618e, a new addition to the Mobile Data Acquisition Product Family, features a compact and streamlined design that allows for quick and easy installation. Suitable for all types of private and commercial vehicles on the road, Waveon 618e is small enough to be mounted under the dashboard console or even under the seats for covert installations. The new Waveon 618e is also backward compatible with the existing Waveon 606 vehicle tracker offered by InfoWave.

Waveon 618e is built on the ARM 7 architectural platform, and utilizes leading wireless module from Cinterion (formerly Siemens), and high-sensitivity GPS module from u-blox to provide reliable and efficient real-time monitoring and control of fleets, while at the same time, to improve vehicle and driver safety.

"With the introduction of OTA firmware upgrade functionality, which is a central element of our new Waveon 618e, InfoWave brings tremendous benefits to fleet managers in their day-to-day fleet operations, as firmware can now be broadcast to all the devices simultaneously wherever the vehicles maybe," said Mr. Loh Choon Seng, Managing Director of InfoWave. "This coupled with the use of market-leading components and modules, makes Waveon 618e an attractive choice for fleet managers, as it ensures quality and reliability. After all, any downtime means costs incurred by the fleet managers."

Availability

Waveon 618e is now available through InfoWave's worldwide network of distributors and strategic partners. Organizations seeking to buy this product should contact InfoWave at sales@infowave.sg.

About InfoWave

Founded in 2002, InfoWave is a leading provider of wireless communication devices, solutions and services to organizations in the transportation, logistics, public safety, and homeland security and defense industries.
